1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c). Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claim 1 recites the broad recitation of elongate body parts, and the claim also recites particularly the penis which is the narrower statement of the range/limitation.

Claim 15 contains the trademark/trade name "Velcro". Where a trademark or trade name is used in a claim as a limitation to identify or describe a particular material or product, the claim does not comply with the requirements of 35 U.S.C. 112, second

Art Unit: 3735

paragraph. See *Ex parte Simpson*, 218 USPQ 1020 (Bd. App. 1982). The claim scope is uncertain since the trademark or trade name cannot be used properly to identify any particular material or product. A trademark or trade name is used to identify a source of goods, and not the goods themselves. Thus, a trademark or trade name does not identify or describe the goods associated with the trademark or trade name. In the present case, the trademark/trade name is used to identify/describe a hook and loop fastener and, accordingly, the identification/description is indefinite.

4. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-20 are rejected under 35 U.S.C. 101 because the claimed invention lacks patentable utility. The claims lack support for the invention "permanently" extending body parts since it is based upon having no credible evidence that the device will permanently extend the body part.

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1, 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Siana (WO 96/26691).

Art Unit: 3735

Siana discloses a device for generating a permanent elongation of a penis having a substantially ring-shaped element (1) or support ring proximally on the penis being provided with hinge elements (2) which secure connecting elements (3) or stretching rods that are adjusted using adjustment means (10). Siana has a fixing means (4) has a cylindrical component that surrounds the body part and a retaining clip (7). The retaining clip in both the present invention and the prior art is considered to run in the longitudinal direction since they are on the "outer rim" in the sense that they are on the outer surface or the end of the fixing means and the "outer rim" has not been structurally defined or lacks proper antecedent basis. In the specification the clip 15 of the present invention is said to be on the rim of element 14, here the rim is the end of element 14. The same can be said of clip 7 of the prior art as the clip appears at one of the ends of the fixing means 4. The fixing means/clips of the prior art are locked "sideways" onto the stretching or connecting rods in the same manner as the present invention, they have cylindrical sockets that are slid onto the ends of the rods.

7. Claims 2, 4-20 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
